

One Device. Dual Mode. More Productive

T54W+BT51 — SIP+USB Dual Mode Solution

With BT51, Yealink T54W can be connected to a PC via Bluetooth as a USB peripheral device for UC platform calls, such as Team, Zoom, and RingCentral. Dial-out, calling status synchronization, call control, and other functions of UC calls can be realized through the phone.

This dual-mode solution also supports hybrid UC/SIP meetings, enabling seamless internal and external communication and collaboration, bringing much more convenience.

Persona 1 SIP and UC Platform

- Unified management for calls from both the UC side and SIP side, making the process more organized and efficiency
- Premium audio quality with noise canceling technology

Persona 2 SIP Phone and UC Softphone User

- Hybrid UC and SIP meetings allow seamless collaboration and savings on communication costs by inviting colleagues to UC meetings via SIP calls.

Persona 3 SIP phone & USB speaker/USB headset user

- Unified management of the USB devices, realizing seamless switch between the speaker, handset, and headset mode to meet the needs of various scenarios
