400GB Breeze 5G Data	Uses part of Telstra's **4G & 5G mobile networks**	data banking unavailable	**$85** Minimum cost: $85

Breeze Connect uses part of the Telstra Wholesale Mobile Network, **click here** to learn more. Breeze business mobile plans provide a mobile coverage footprint of 98.8% of the Australian population, covering more than 1.6 million square kilometres. Download speeds are capped at 100Mbps. This is the maximum potential download speed. Typical speeds may often be slower and will vary due to factors such as location, device capabilities, distance from the base station, location conditions, concurrent users, hardware and software configuration and download/upload destination.

5G network access requires a compatible 5G router and is only available in selected areas.
