

CPW90 Wireless Microphone

Introduction

Yealink CPW90 is a wireless expansion microphone that supports 360° omnidirectional sound pickup with a pickup radius of 3 meters, bringing you the ultimate high-definition audio experience.

For the operation video, please refer to [CPW90](#).

Device Compatibility

For the CPW90 maximum number of compatible devices that can be connected to MeetingBar AX0, please refer to [Zoom Rooms Accessories Compatibility Lists](#).

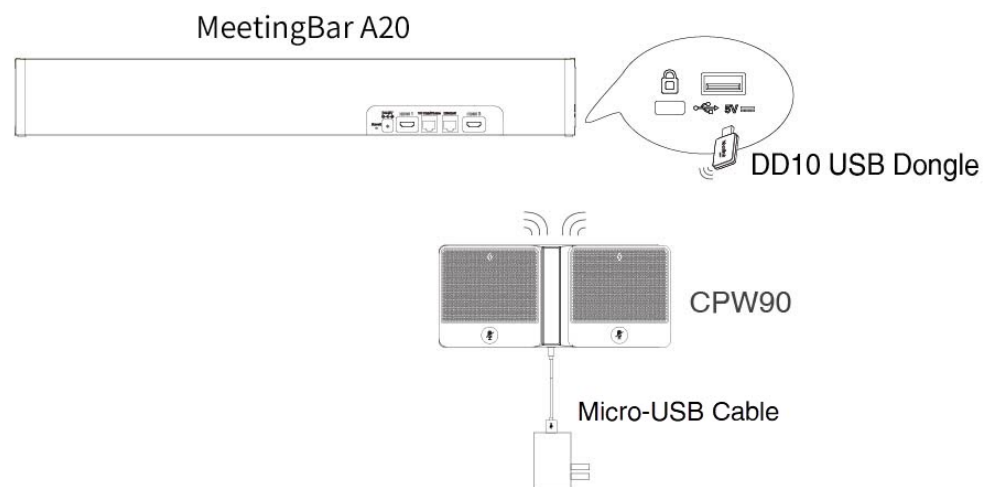

How to Use

Connect CPW90 to A20/A30

1. Connect DD10 USB Dongle to A20/A30

1. Power on CPW90 via the Micro-USB cable and power adapter.
2. Insert DD10 USB Dongle into the USB-A port of the MeetingBar A20/A30.
3. The display connected to the MeetingBar A20/A30 will prompt **Wireless microphone adapter is connected**.

Take the MeetingBar A20 as an example.

2. Pair CPW90 with A20/A30

On the touch panel, go to **Settings > General > System Settings > Audio > Wireless Microphone** to select **Add CPW90**.

Press and hold the mute button on CPW90 for 5s until the mute indicator flashes yellow quickly.

The MeetingBar AX0 is successfully connected to CPW90. Check the connected microphone to unbind or search the microphone.

Audio Settings

If you want to set audio input manually after connecting, please refer to: [Audio Settings](#).

Mute/Unmute Microphone

Please refer to: [Mute/Unmute Microphone](#).

LED Indicator

Please refer to: [CPW90 LED Indicator](#).

Update CPW90

The CPW90 automatically obtains the ROM package from the MeetingBar A20/A30. If you need to use the latest version of CPW90 firmware, please update the MeetingBar A20/A30 to the latest version. For more information, please refer to [Firmware Update](#). The CPW90 does not support individual updates.

FAQ

Can CPW90 and the built-in microphone of the MeetingBar A20/A30 pick up sound at the same time?

The CPW90 is an external microphone and does not support picking up sound with the built-in microphone simultaneously. For more information about the sound pickup of the built-in microphone and external microphone, please refer to [Can the built-in microphone and external microphone pick up sound at the same time?](#)

After connecting MeetingBar A20/A30 to the CPW90, the CPW90 cannot pick up the audio/there is no response when touching the CPW90 mute button.

MeetingBar AX0 does not support the simultaneous use of multiple different types of microphones, such as the simultaneous use of VCM35 and CPW90. Please check whether other microphones are connected at the same time. For more information, please refer to [Does the MeetingBar AX0 support multiple microphone devices at the same time?](#)

How to reset the CPW90 microphone?

The CPW90 microphone does not support reset. If there is a problem with the CPW90, please refer to [CPW90 Troubleshooting](#).
